- \* **Location Tracking Software**

Advance Care's new Wireless Nurse Call System utilizes U.N.B (Ultra Narrow Band) technology, along with frequency hopping to ensure a long range, reliable and virtually interference free transmission.

Supervisory transmission's which include battery status level ensure that all call buttons are monitored for correct operation.

With all of Advance Care's standard features including Silicone buttons, standardised colour coding, dual press assist function and industry standard 6.3mm socket ensure that the system can stand alone or compliment existing installations.

\*2.4 Km's as tested free air line of site. \*\*Based on 4 x 5 minute calls per day, including supervisory transmissions.
