6.35mm Plug

Waterproof

Standard

SUMMARY

The Advance Care range of call pendants have been ergonomically designed, ensuring the devices are easy for residents to hold and activate.

The pendants also have clips so they can be attached to the resident's bed or clothing to keep them within easy reach.

Available in both standard and waterproof models, the Advance Care pendant range comes equipped with tough fully moulded 6.35mm jacks.

The Advance Care system includes a 'pendant removed' alarm feature which generates an alert if the pendant is accidentally pulled out or incorrectly plugged in.
